PERSONAL PROFILE

Results-driven Senior SAP ABAP Developer and Software Engineer with over 10 years of experience designing and delivering robust SAP solutions and enterprise web applications. Highly specialized in SAP ABAP core development, third-party system integrations (REST/SOAP APIs), business process automation, and full-stack development using the Laravel framework. Proven track record in streamlining corporate operations, including delivering end-to-end E-Procurement portals and automated HRIS/HCM applications. Adept at bridging the gap between complex technical requirements and scalable, business-driven software engineering solutions.

PROFESSIONAL EXPERIENCE

SPS Corporate, Surabaya, Indonesia

2025 – Present

SAP ABAP Developer

- Architected and successfully delivered an end-to-end custom Vendor Registration Portal using Laravel integrated with SAP via custom Web APIs, automating vendor onboarding and master data creation processes.
- Designed and implemented robust integration layers between SAP systems and third-party solutions using secure REST/SOAP APIs and custom interfaces.
- Developed critical procurement automation programs including RFQ uploads, automated price updates, reservation uploads, and optimized batch Goods Receipt (MIGO) processing.
- Engineered automated bank template export programs and reporting tools, significantly enhancing the efficiency of monthly financial operations.
- Implemented automated barcode label printing solutions to optimize warehouse workflow, layout compliance, and inventory tracking.
- Collaborated closely with Functional Consultants (MM, FI/CO) and business owners to translate business logic into high-quality technical specifications and ABAP solutions.

Yayasan Badan Wakaf UII, Yogyakarta, Indonesia

2022 – 2025

SAP ABAP Developer

- Designed, coded, and deployed a custom SAP Dialog Program for Sales Order (SO) Creation, which was successfully adopted and streamlined day-to-day operations at Universitas Islam Indonesia (UII).
- Developed and deployed a custom web-based Human Capital Management (HCM) and HRIS application using Laravel, supporting employee master data, leave administration, and real-time attendance management via Web View.
- Built a secure digital document submission and automated workflow engine with multi-level tier approval paths to eliminate administrative bottlenecks.
- Engineered custom SAP ABAP solutions including complex ALV Reports, SAP SmartForms/Adobe Forms, Dialog Programming, and high-volume data upload tools (BDC/LSMW).
- Led rigorous system analysis sessions with stakeholders to map core business workflows into scalable technical specifications.
- Spearheaded the end-to-end web development, security configuration, and production launch of the official websites for Lembaga Wakaf Uang Unisia (LWU) and SMA UII using WordPress.

PT. Meka Adipratama, Semarang, Indonesia

2019 – 2022

SAP ABAP Developer

- Developed customized SAP ABAP reports, interactive dialog programs, and operational forms to fulfill critical business unit requirements.
- Optimized SAP Query Reports and heavy database lookups by leveraging AMDP (ABAP Managed Database Procedures) and CDS Views, significantly enhancing system performance and report execution time.
- Collaborated with SAP functional leads to deliver agile technical solutions during major system updates and optimization sprints.
- Maintained, debugged, and enhanced legacy ABAP programs to ensure continuous system stability and maximum uptime.

PT. Indoprima Utama, Bali, Indonesia

2016 – 2019

IT Support Staff

- Administered network infrastructure, oversaw server environments, and maintained system connectivity across multiple branches.
- Managed regular database backup operations, disaster recovery testing, and predictive infrastructure maintenance schedules.
- Provided advanced technical troubleshooting and Tier-2 software/hardware support to end-users to ensure business continuity.

PT. Eclectic Consulting, Surabaya, Indonesia

2015 – 2016

SAP ABAP Developer (Project : Pollux Property Jakarta)

- Developed custom operational and analytical SAP ABAP reports tailored for real estate and property management business operations.
- Created customized print programs and official business document formats using SAP Forms and SmartForms.
- Programmed transactional screens using SAP Dialog Programming to improve user experience and reduce data entry errors.

Klinik Estetika dr. Affandi, Semarang, Indonesia

2013 – 2015

IT Support Staff

- Administered corporate Windows Server environments and managed local IT network infrastructure.

SMK N 11, Semarang, Indonesia

2011 – 2013

IT Staff

- Maintained school computer laboratory infrastructure and provided technical workstation support.

EDUCATION

Universitas Stikubank (UNISBANK), Semarang, Indonesia

Bachelor of Computer Science | 2012 - 2015

TECHNICAL SKILLS

- SAP Technologies : SAP ABAP, AMDP, CDS Views, BAPI, BDC (Batch Data Communication), ALV Reports, SmartForms, Dialog Programming, Data Migration & Upload Programs.
- Integration & Modality: Web APIs (REST/SOAP), Interface Management, Third-Party System Integrations.
- Web Development: PHP, Laravel Framework, MySQL.
- Content Management Systems: WordPress.
- System Analysis: Business Requirement Analysis, Process Improvement.
